

For Immediate Release

**COMPUTER INFORMATION TECHNOLOGY PROGRAM RECEIVES
GENEROUS IN-KIND DONATION**

Scranton, PA – February 26, 2009 – Johnson College’s Computer Information Technology Program recently received a generous in-kind donation of six rack cabinets, from PNC Bank.

Joseph Polinsky, Department Chairperson of the Computer Information Technology Program at Johnson College, says, “I am very appreciative, [the donation] gives the students real life opportunity to experience real life work... Building a network is like building a house from a security point of view.”

The students use the racks daily for projects involving network building and repair and storage of advanced software. The racks’ steel beams, metal frames, glass doors, and secure locks, make the units ideal for the students’ advancement in learning the computer technology field.

From Left to Right: Mr. James R. Minicozzi, C.P.T., N.G., N.G., N.G.B., Mr. James Widner, Network Enterprise Services PNC Bank, and Joseph Polinsky, Department Chairperson of the Computer Information Technology Program at Johnson College.
